

# Nintex<sup>®</sup> for SharePoint 2016

Workflow and Forms for On-Premises and Hybrid Deployments

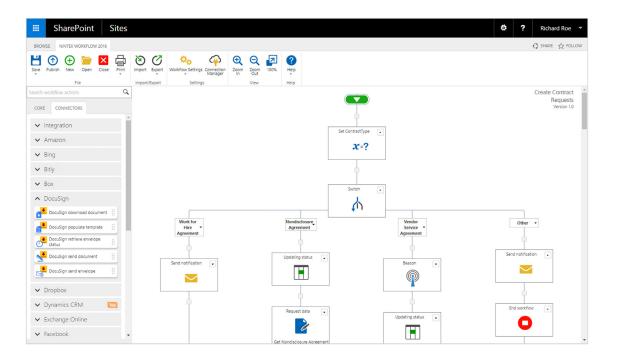

With the latest release of Nintex Workflow and Nintex Forms for SharePoint 2016, you can easily design and deploy hybrid workflows that can interact between on-premises and cloud applications.

The user experience is more intuitive across all facets; including installation, administration, help and design, with support for all popular browsers such as Edge, Internet Explorer, Chrome, Firefox, and Safari.

# Key Features

- 1 REDESIGNED TOOLBOX
- 2 EXTERNAL START
- 3 MODERN BROWSER SUPPORT
- 4 ONLINE HELP
- 5 EASY INSTALLATION
- 6 SIMPLIFIED ADMINISTRATION

#### NINTEX

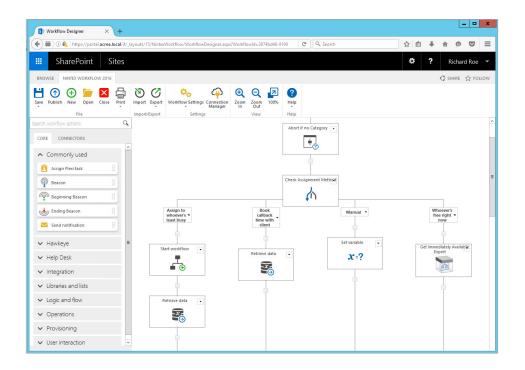

## **REDESIGNED TOOLBOX**

Improved toolbox for easy access to Nintex connectors, grouped logically, to connect seamlessly to cloud services Enhanced visibility of actions, through better categorization, new UI and smaller icons
